This is typically caused by a failure in the JDK. Ensure that your classpath contains no missing / outdated libraries, and that you are properly invoking javac. I've tried Uninstalling/reinstalling JDK and JRE Running java -version and get java version 1.8.0_144 Checked my classpath and everything seems ok I have no idea what's causing it. I have the Java SDK installed and my CLASSPATH environment variable is set to include it. Could
