DICOM Storage Requirements: Supported operating systems: Windows XP, Windows 7, Windows 8.1, Windows 10 Minimum hardware requirements: 2 GHz CPU 256 MB RAM 8 GB hard disk 30 MB available disk space 10 MB available disc space for a program Additional Requirements:

Makhaon DICOM Storage X64

Makhaon DICOM Storage is a practical and straightforward software solution worth having when you need to upload DICOM images to your Firebird database and store them to a secure location. The main window of the application is quite simple and enables you to easily upload files and folders to your Firebird storage. Although Makhaon DICOM Storage does not require you to perform any advanced configurations, you need to know how to work with a Firebird storage. Otherwise, you will not be able to use the application since a connection to a Firebird database is the main request. Still, before using the application, you need to make sure that all the services are installed onto your system and work properly. Then, you can easily view the number of available studies, series and images, as well as to change the storage title and the port number. By simply connecting all the DICOM devices to your computer, you have the possibility to archive all the available DICOM images and easily store them to your

Firebird database. This way, you can always access them as long as a Firebird instance is installed in the PC you are trying to access your database from. Another feature worth mentioning is that Makhaon DICOM Storage provides you with multi-thread image processing, export and transfer options. This way, you can transfer your images from a device to another one according to the device sender, tag presence and correspondence. Instead, a downside of the application is that it works only with Firebird databases and taking into considerations that not so many users know how to work with Firebird, they would rather prefer to use utilities that provide support for other databases. All things considered, Makhaon DICOM Storage is a reliable and useful application whose main purpose is to help users archive, store and organize DICOM images inside Firebird databases. MS Dynamics GP 2013 / Office 365 Component (Win32) CRM | ERP | CMS | Liferay - Integration with the most common ERP Solution Point-of-Sale | Inventory Management | Customized ERP Solution From CRM applications to ERP applications, from CMS to Retail Our solutions are tailored to the needs of various industries such as Finance, Banking, Health and Education.
