On this site I am an IOT Hardware and Smart Home Automation (SAP,Zigbee,RF,Sonos,Google IoT Platform), IoT Internet of Things and Network Security Expert and Technical Writer. I love to help people solve problems when it comes to home automation and smart home automation (or in general), I'm a great network administrator, storage administrator, technical writer with IOT, IoT and Internet security knowledge. I'm also a great gamer, a small business owner, and a father of two young girls. I have worked with kids and their schools for many years and just tried to be more proactive in my children's education than my parents. I've been around for a long time; I am currently in WiKnows technology position. Writing about images in isolation was never a good idea. It was hard to get a sense of what a picture might mean, of what it represents. In order to help you study an image, we've asked a number of expert photographers, painters, and critics how they would work with a particular picture, and then put together a short, curated list of their working methods. It's interesting to read how they look at the same image and see it through their eyes. The cloud service now also allows you to publish images to social networks. I did not test it and figure that I could do it locally, but I think that it is a welcome addition. After all, that's how I keep in touch with friends and family despite my lack of time to visit them. **ABOVE:** Clicking on the screen icon shows you more information about this particular photo, as well as the date it was taken. You can reorder the thumbnails by dragging them. Giraffes are very difficult to catch on film, so I think they will do well in digital photography! **BELOW:** Tapping the screen icon in the thumbnail allows you to zoom in.
